Huawei Mobile Services White Paper@2020

Create better all-scenario intelligent life experience for global users

In 2019, Huawei Mobile Services, along with more than 600 million Huawei Device monthly active users and 1,300,000 registered developers worldwide, witnessed "The Smart Revolution of Global Ecosystem and Digital Life".

Rapid improvements to AI, and the emergence of 5G technology, have made mobile phone-centric smart services ubiquitous in daily life. Huawei Mobile Services is based on Huawei's synergistic "Chipset-Device-Cloud" technology, and dedicated to enriching users' lives with next-level content and services that meet every conceivable need, and span diverse fields, including smart home, health and fitness, mobile office, smart travel and entertainment. In 2019, users spread across 170+ countries and regions, and made 210+ billion downloads in HUAWEI AppGallery. Huawei Mobile Services commitment to users' privacy, and prowess in data security, ensures that users can enjoy the full range of global and localized apps, with maximum peace of mind.

A fully-connected, intelligent ecosystem requires a dedication to openness and innovation. Huawei Consumer Business Group has fully opened up HMS ecosystem to global developers, allowing them to quickly access to it for application innovation and resource sharing. As the core capabilities in the ecosystem, HMS Core provides for smart global distribution across all devices, and to meet all user scenarios, allowing developers to double down on innovation by focusing on areas of strength. The Shining-Star Program continues to upgrade, providing billions of resources to encourage global developers, focusing on AI, AR/VR, IoT, and instant access. Through initiatives such as talent training, development support, innovation support, marketing resource assistance, and preferential cloud infrastructure resources, Huawei builds a important entrance to full-scenario smart mobile services ecosystem, and enriches the digital life of users.

In 2020, Huawei Mobile Services will continue to prioritize the construction of ecosystem, and the enhancement of user experience, by empowering developers with cutting-edge technology and full-throttled support. Let's work together to build a fully-connected, intelligent world!

Alex Zhang

President, Cloud Service, Huawei Consumer Business Group

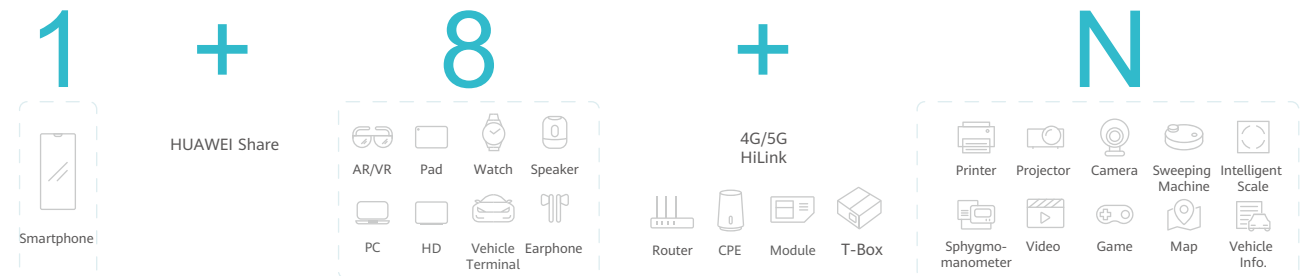

600,000,000

In 2019, Huawei Device monthly active users reached 600 million, and the number of Huawei Mobile Services monthly active users increased by 52.7%.

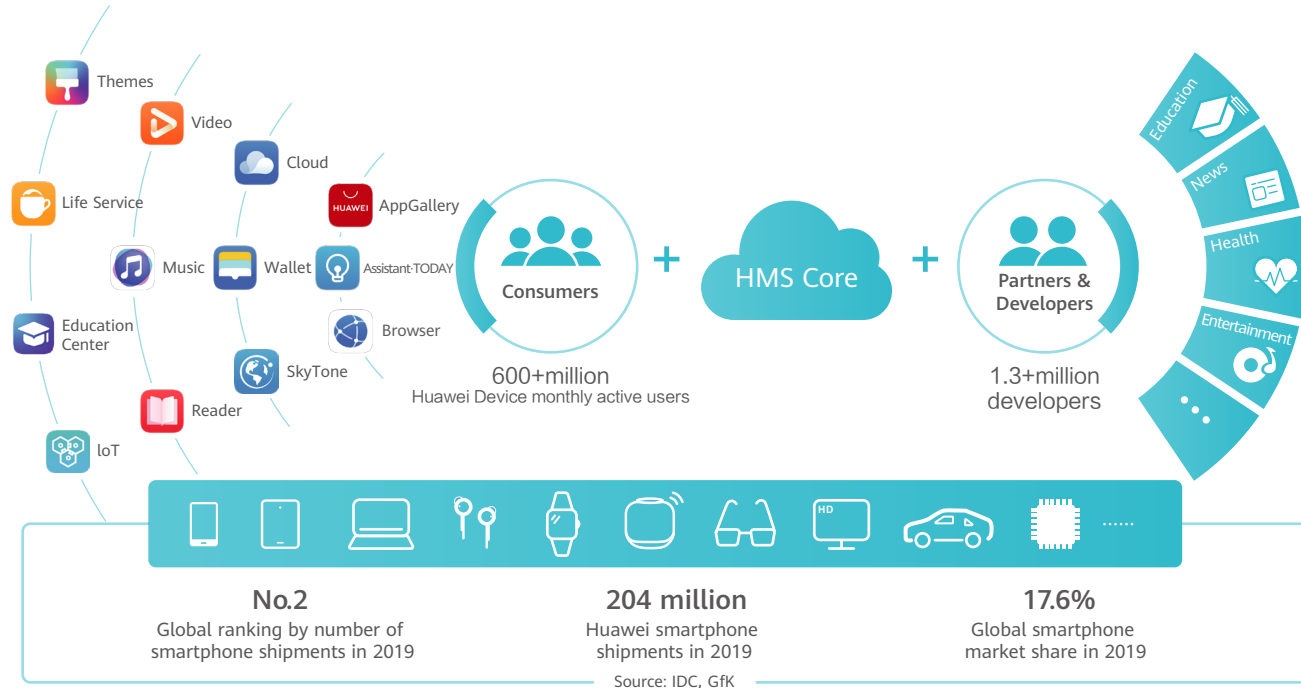

Create a new intelligent experience and HMS ecosystem in the all-scenario era.

All-scenario intelligent experience
All-scenario intelligent lifestyle services for a global user base

HMS: An ascendant global ecosystem
HMS ecosystem, facilitating mutually beneficial collaboration with global partners and developers

Huawei Mobile Services offers high-quality and intelligent digital life experience in all scenarios.

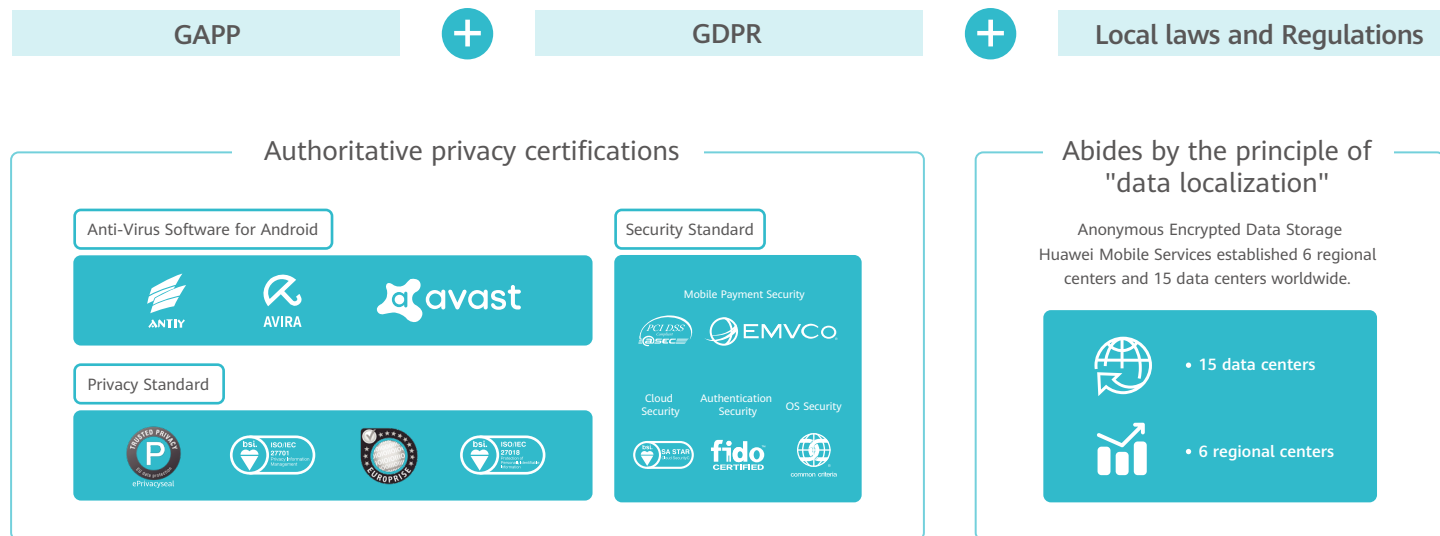

Huawei Mobile Services established 6 regional centers and 15 data centers worldwide. Huawei Global Cloud Operations Center (GCOC) reached the international industry standard. By the end of 2019, 21 businesses were launched globally, including HUAWEI AppGallery and HUAWEI IAP, both of which serve 170+countries and regions.

All-scenario Intelligent Lifestyle

Users have increasingly prioritized privacy and security. Huawei Mobile Services has been certified by global privacy standard authorities, and comes bolstered with numerous user data security safeguards.

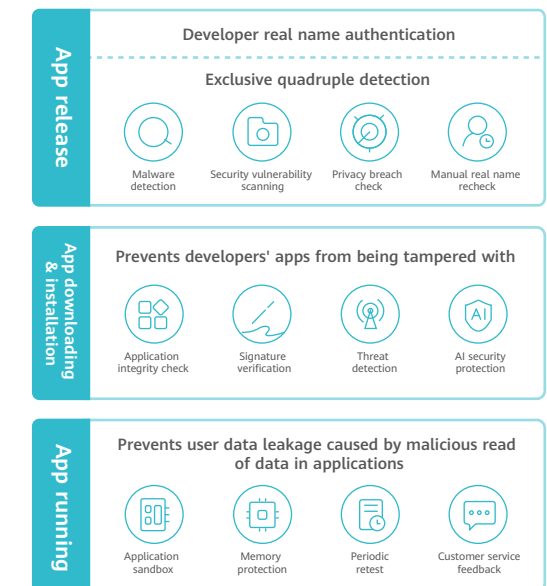

Global Privacy Compliance Framework for Huawei Mobile Services

On devices, and an app-to-app basis, Huawei provides multi-layer security verifications that empower users to manage their data privacy in real time.

Multiple security verification mechanisms are deployed on the device, to build an isolated TEE (Trusted Execution Environment) OS, thereby ensuring that personal sensitive data is stored on devices.

HUAWEI AppGallery has built a fail-safe, end-to-end security assurance system, via developer real name authentication, exclusive quadruple detection, download and installation assurances, and additional protective safeguards.

Ever-attentive to the needs of parents and younger users, HUAWEI AppGallery and HUAWEI Video come with "age restrictions" to ensure that minors only access age-appropriate apps and content.

A professional rating system and thoughtful reminders help parents choose age-suitable apps for their children.

Age Restrictions

HUAWEI AppGallery features a five-level "age restriction" classification that recommends specific apps according to age range.

Download Reminders

Parents can create a child's account in HUAWEI ID, and receive pop-up notifications when their children download unsuitable apps.

Age Ratings

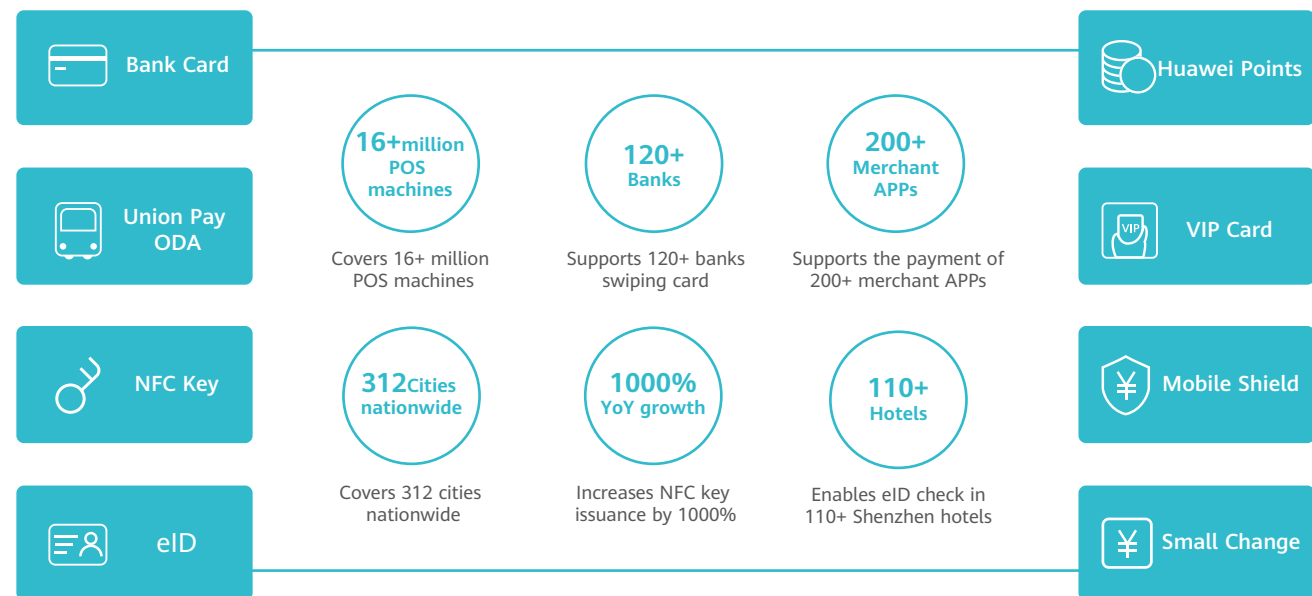

HUAWEI Video features a content rating system according to the following age groups: 0 to 6, 7 to 17, and 18+.

Young adult users are unfazed by new technology, and willing to obtain content and services in a more direct and intelligent way.

HUAWEI Assistant-TODAY provides users with Smart Search, Instant access, Smart Care and News functions.

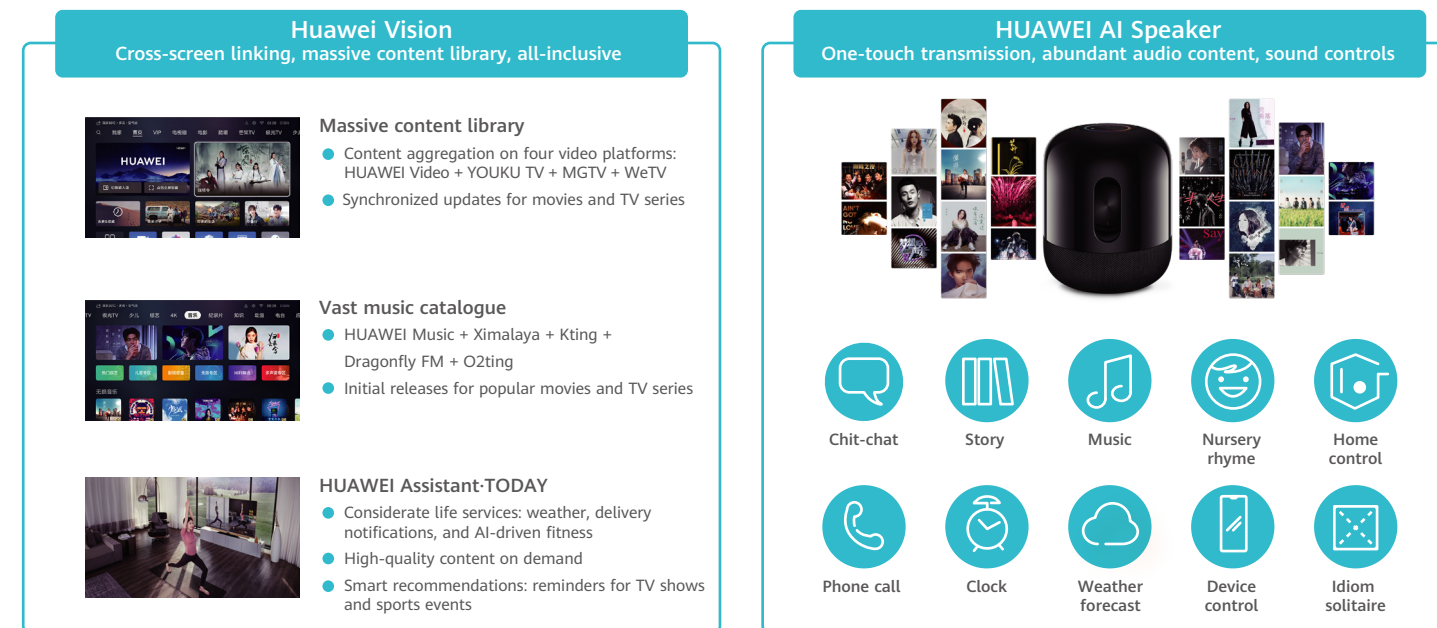

HUAWEI Wallet is bolstered by cutting-edge technology, and facilitates next-level mobile finance and travel services.

HUAWEI Wallet aggregates life services, including cards, certificates, tickets, coupons, and keys, onto a single platform. In 2019, Huawei Pay launched the Smart Card experience, providing users with matched ease through automatically choose.

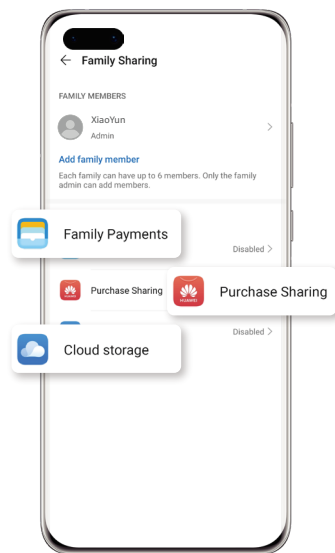

Huawei has broken down barriers between devices, facilitating seamless, connected intelligence that enriches daily life immeasurably.

Smart cross-device content and services that meet all user needs. Connected intelligence, fluid operations, continual improvement and updated content.

"Family Sharing" feature to connect users with loved ones.

Family members can share payments, purchases and cloud storage, via the Family Sharing feature.

More users prefer to store personal data, especially photos and videos, on the HUAWEI Mobile Cloud.

HUAWEI AppGallery Connect maximizes development efficiency.

64 services have been enabled by HUAWEI AppGallery Connect, 45 of which have been opened to overseas developers.

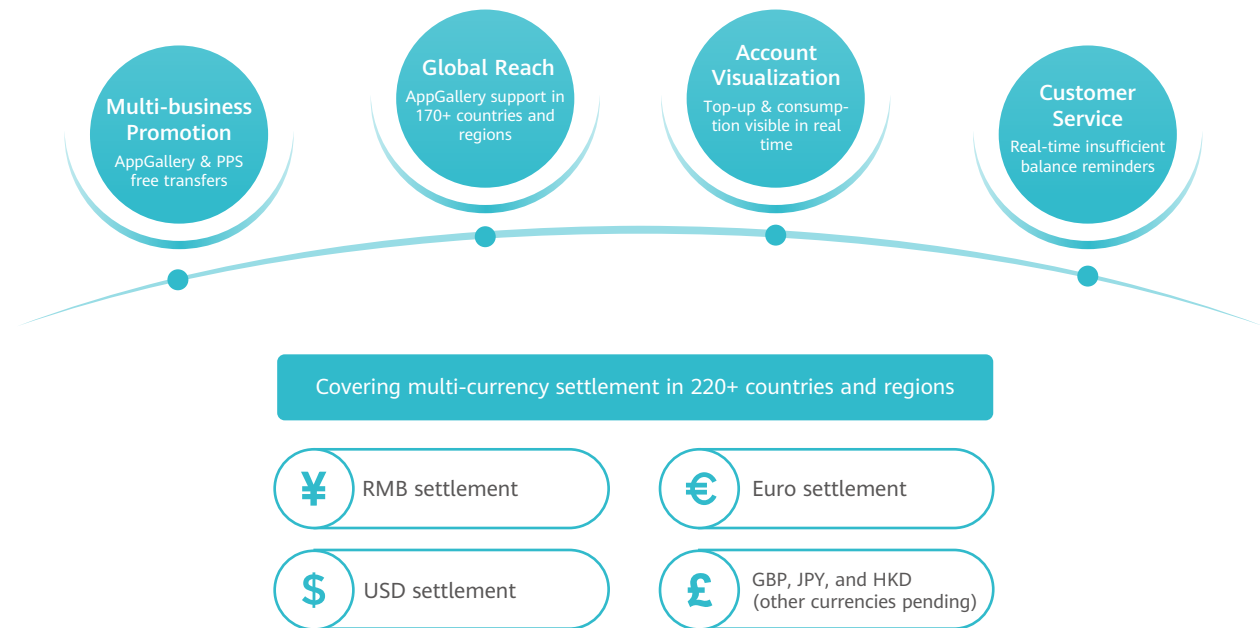

HUAWEI DEVELOPERS: One-Point Access, Global Reach.

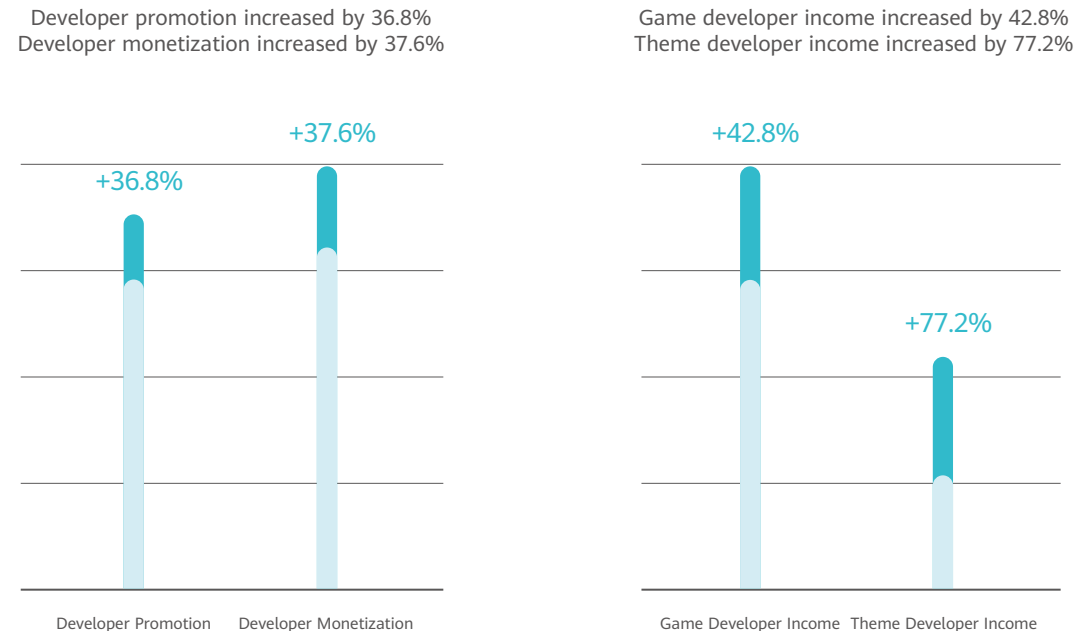

Comprehensive account & merchant services for developers.

HUAWEI DEVELOPERS provides global business settlement service, so that developers can enjoy free and convenient top-up and consumption through a single account, and carry out multi-currency transactions across 220+ countries and regions.

Nurturing developer growth and development, via effective promotion and monetization.

HUAWEI DEVELOPERS helps global developers promote and monetize their apps through joint operations, HUAWEI Ads, pre-installation, and a wide range of other services.

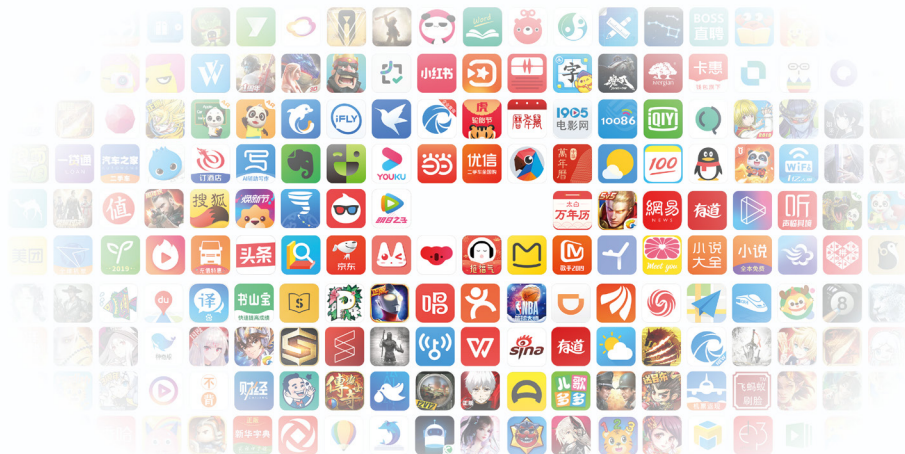

Huawei Shining-Star Program provides billions of resources for global developers to innovate and build an all-scenario intelligent ecosystem of the future.

The Shining-Star Program is dedicated to working with global developers and partners to provide users with innovative digital content and services that revolutionize daily life:

- Enhanced support for medium- and long-tailed applications, providing multi-dimensional support for innovative development work, from app integration to release, end-to-end operations across the full lifecycle for local applications.
- Seamless integration with Huawei's local sales resources, for marketing and promotional support.
- Encouraging developers to think globally, beyond their local market, facilitating the release of innovative apps in new markets.

< H-STAR > Huawei Shining-Star Program

More than ten thousand applications have been received incentive.

Connecting developers across the globe, through bold initiatives and shared capabilities.

< HDC > HUAWEI DEVELOPER CONFERENCE

Huawei Developer Conference

- Huawei Developer Conference is an annual conference where the latest open capabilities and technological achievements are showcased.
- The Huawei Developer Conference 2019 attracted 6,300+ developer attendees, involved 50 technical exchanges, with more than 1,000 participants at the Codelab development practice.

< HDD > Huawei Developer Day

Huawei Developer Day

- Huawei Developer Day is a series of events that showcase the latest HMS open capabilities and services, innovative technologies, research achievements, applications, and industry trends.
- In 2019, 45 HDD events were held in 32 countries and regions, attracting tens of thousands of developers.

< HSD > Huawei Student Developers

Huawei Student Developers

- Huawei Student Developers is a support initiative for global student developers, facilitating engagement, and nurturing talent within a campus context.
- In 2019, HSD established a presence at 50 top universities, and attracted 600+ student members. There are now more than 200,000 Huawei student developers.

Connecting developers across the globe, through bold initiatives and shared capabilities.

< HDE >

Huawei Developer Experts

HUAWEI Developer Experts

HUAWEI Developer Experts (HDE) is a global program to recognize individuals who are experts and thought leaders in one or more HUAWEI technologies. These professionals actively share the latest cutting-edge technologies, facilitate global technological innovation, and contribute to the development of the global developer ecosystem.
